

VP-427UHD

4K HDBT Receiver / Scaler Tool with HDBaseT and HDMI Inputs

VP-427UHD is a comprehensive 4K HDBaseT receiver scaler with a local HDMI input. It supports automatic and manual switching between the 2 inputs, with fast and visually seamless transitions. The unit up-scales, down-scales, and cross-scales to resolutions up to 4K@60 (4:2:0). The output resolution is set by the user or follows the native resolution of the source

FEATURES

Comprehensive Receiver/Scaler - Scales signals of all standard resolutions up to 4K (4:2:0) for routing to the HDMI output. Constant output sync prevents signal disruption when switching between inputs and when no video is detected

Flexible Audio Output - Analog balanced stereo and digital S/PDIF outputs for de-embedding the audio output

Data Tunneling - Extend RS-232, IR, and Ethernet over the HDBaseT line

Cost-Effective and Convenient Control Options - Ethernet and RS-232 serial ports, and local control via front panel input selection and OSD menu buttons

Versatile Powering Options - Power the unit with PoE (Power over Ethernet) over the HDBaseT line or with the power adapter

Easy Installation - Single cable connectivity for both the HDBaseT signal and PoE power. Compact MegaTOOLS® fan-less enclosure for surface mounting or side-by-side mounting of 2 units in a 1U rack space with the recommended rack adapter
